DEVELOPMENT AGREEMENT

Dx7 Dialysis Exchange Dashboard

Field	Value
Date	_____, 2026
Agreement Number	DX7-DEV-2026-001

This Development Agreement ("Agreement") is entered into by and between:

Party	Details
Client	**Invenia Intelligence Médicale SAS** Represented by: Reggie Halili, Product Owner
Contractor	**Cornelio Gallardo** Individual Contractor

1. Scope of Work

The Contractor shall design, develop, and deliver **Dx7 v1**, a Progressive Web App (PWA) for dialysis clinic staff to view pre-session laboratory results, as defined in the Reference Specification.

Reference Specification: Dx7 PRD+SAD External Review Edition v1.3 (February 2026), including Appendix B: Architectural Invariants. This document defines the complete functional and architectural scope for this engagement.

The scope includes:

Component	Description
HL7 Ingestion Module	MLLP/HTTPS listener, ORU parser, normalizer, canonical result objects, raw message retention
Backend API	REST API with authentication, RBAC, tenant isolation, sessions, results, MD notes, export, audit logging
Frontend PWA	Patient roster, shift selection, results view (pass-through), chair assignment, MD notes, admin CRUD, branding
Admin (v1 scope)	PL Admin: user + center CRUD. Clinic Admin: user CRUD (own clinic). SysAd: seed scripts only, no UI.
Deployment	DigitalOcean. Managed PostgreSQL + application droplet.

Explicitly excluded from this Agreement: Full admin console, PWA offline/installable mode, healthcare certification, continuous audit, HL7 simulation scripts, multi-LIS integration, extensive documentation, database performance tuning, trend arrows, Angular framework.

2. Technology Stack

Layer	Technology	Constraint
Frontend	Vue.js	Angular is excluded. Architectural requirement for design system continuity.
Backend	.NET 8 (C#)	Disposable at platform transition. API contracts must match canonical patterns.
Database	PostgreSQL	Multi-tenant with tenant_id on all tables. Row-level security or equivalent.
Deployment	DigitalOcean	Managed PostgreSQL + Droplet. No AWS/Azure.

3. Timeline

The project shall be completed within **eight (8) to ten (10) weeks** from the Effective Date, subject to the following phasing:

Week	Deliverable	Notes
1	**Architecture & Design**	Schema, API contracts, project setup. Ingestion Semantic Anchor gate must pass.
2	**HL7 Ingestion Module**	Listener, parser, normalizer, storage. Test with real HCLab ORU messages.
3–4	**Core API + Auth**	Auth, patients, sessions, chairs, results, MD notes, export. Tenant isolation enforced.
5–7	**Frontend + Admin + Branding**	Roster, results view, MD notes, chair assignment, admin CRUD, branding. Vue.js.
8	**Integration & Testing**	End-to-end with real HL7. Invariant verification tests. Iterative fixes with PO.
9–10	**Deployment & Handover**	DigitalOcean. Basic deployment guide. Code walkthrough. Go-live support.

4. Commercial Terms

4.1 Fixed Price

The total fixed price for the Scope of Work is **Philippine Pesos Four Hundred Thousand (₱400,000)**, inclusive of all labor, tools, and incidental costs.

This amount is derived from an estimated 500 hours at ₱800 per hour. The hourly rate applies only if scope changes are mutually agreed under Section 6.

4.2 Payment Schedule

Payment is structured across four (4) milestones, each tied to a deliverable gate:

#	Payment	Gate	Amount	Week
DP	**Downpayment**	On signing. NDA executed.	₱80,000 (20%)	0

M1	**Architecture + HL7 Ingestion**	Semantic Anchor gate passed. Real HCLab ORU processed end-to-end. Tenant isolation backstop confirmed.	₱120,000 (30%)	1–2
M2	**Backend API + Frontend**	All API endpoints functional. Tenant isolation verified. Full UI integrated. Admin CRUD functional. Branding applied.	₱120,000 (30%)	3–7
FA	**Final Acceptance**	Deployed to DigitalOcean. Invariant verification tests passed. Code walkthrough complete.	₱80,000 (20%)	8–10

Each milestone payment is due within seven (7) business days of the Client's written acceptance of the corresponding deliverable gate.

4.3 Acceptance

The Client shall review each milestone deliverable within five (5) business days of submission. If the Client rejects a deliverable, written reasons must be provided, and the Contractor shall have ten (10) business days to remedy.

5. Architectural Acceptance Gates

The following gates are pre-build acceptance criteria, not post-build QA. Development shall not proceed past the relevant phase until each gate is satisfied in writing.

5a. Ingestion Semantic Anchor

Before HL7 ingestion code is accepted:

a) Define the canonical result object structure that HL7 normalizes to.

b) Explicitly define and version the canonical schema.

c) Document how HCLab test codes map to stable analyte identifiers.

d) Define handling for unmapped HL7 fields: quarantine and surface for review. No best-effort mapping. No silent discard.

5b. Trust Boundary Commitments

Before frontend development proceeds:

a) No auth tokens in localStorage or sessionStorage. Define the storage pattern.

b) PostgreSQL RLS or equivalent database-level tenant isolation backstop.

c) No public MLLP. VPN tunnel or edge relay only. Transport topology confirmed.

5c. Invariant Verification Tests

Before deployment:

a) Tenant_id injection at API boundary: every endpoint injects from authenticated session, never from client input.

b) RLS validation: queries without tenant context return zero rows, not all rows.

c) Cross-tenant exfiltration: attempts to access records belonging to a different tenant must fail.

6. Change Orders

Any work outside the Reference Specification requires a written Change Order signed by both parties before work begins. Change Orders shall specify the additional scope, estimated hours, and cost at the agreed rate of ₱800 per hour.

No verbal or implied scope changes are binding. The Contractor shall not commence work on any change until a signed Change Order is received.

7. Contractor Obligations

The Contractor shall:

a) Perform the work personally or with disclosed team members approved by the Client in writing.

b) Maintain regular progress communication with the Product Owner, including weekly written status updates.

c) Deliver source code via a Git repository accessible to the Client throughout the engagement. The repository shall be updated with working code no less than weekly.

d) Comply with the seven (7) Architectural Invariants defined in Appendix B of the Reference Specification. Deviation from any invariant requires prior written approval from the Client.

e) Not subcontract any portion of the work without prior written consent from the Client.

f) Notify the Client within two (2) business days of any material risk to the timeline or deliverable quality.

8. Client Obligations

The Client shall:

a) Provide access to real HCLab HL7 ORU message samples before Week 2.

b) Provide DigitalOcean account credentials or project access for deployment.

c) Designate the Product Owner (or authorized representative) as the single point of contact for scope decisions and acceptance.

d) Respond to milestone submissions within the acceptance period defined in Section 4.3.

e) Facilitate HL7 transport topology discovery (VPN or edge relay) with LABExpress IT.

9. Intellectual Property

All work product, source code, documentation, designs, and deliverables produced under this Agreement (“Work Product”) shall be the exclusive property of the Client upon delivery.

The Contractor assigns to the Client all rights, title, and interest in the Work Product, including all intellectual property rights, upon delivery of each milestone. The Contractor retains no rights to use, license, or distribute the Work Product or any derivative thereof.

The Contractor may retain general knowledge, skills, and experience gained during the engagement, provided such retention does not include proprietary code, architecture, or trade secrets specific to Dx7 or the Client’s business.

10. Confidentiality

The Contractor shall treat as confidential all information received from the Client in connection with this Agreement, including but not limited to: the Reference Specification, system architecture, business strategy, partner relationships, patient data, and any information relating to the Client's platform ecosystem, commercial partnerships, and technology roadmap (collectively, "Confidential Information").

The Contractor shall not disclose Confidential Information to any third party without the prior written consent of the Client. This obligation survives termination of this Agreement for a period of two (2) years.

Confidential Information does not include information that: (a) is or becomes publicly available through no fault of the Contractor; (b) the Contractor can demonstrate was independently developed without reference to the Client's Confidential Information; or (c) was lawfully in the Contractor's possession prior to disclosure.

The Contractor shall ensure that any team members or subcontractors (if approved under Section 7(e)) who access Confidential Information are bound by equivalent confidentiality obligations.

Upon termination or completion of this Agreement, the Contractor shall return or destroy all copies of Confidential Information within fourteen (14) days, and confirm destruction in writing upon request.

11. Termination

11.1 Termination for Convenience

Either party may terminate this Agreement with fourteen (14) days written notice. In the event of termination for convenience, the Client shall pay for all milestones accepted prior to the termination date, plus a pro-rata payment for work completed toward the next milestone, subject to delivery of all Work Product completed to date.

11.2 Termination for Cause

Either party may terminate this Agreement immediately upon written notice if the other party materially breaches any term and fails to cure the breach within fourteen (14) days of written notice of the breach.

11.3 Effect of Termination

Upon termination, the Contractor shall deliver all Work Product completed to date, including source code, documentation, and deployment artifacts. Sections 9 (Intellectual Property), 10 (Confidentiality), and 13 (Governing Law) survive termination.

12. Warranty

The Contractor warrants that the Work Product shall materially conform to the Reference Specification for a period of **thirty (30) days** following final milestone acceptance ("Warranty Period"). During the Warranty Period, the Contractor shall remedy any defects at no additional cost.

This warranty does not cover defects arising from modifications made by the Client or third parties after delivery, or from use of the Work Product outside its intended scope.

13. Governing Law

This Agreement shall be governed by and construed in accordance with the laws of the **Republic of the Philippines**. Any dispute arising from or related to this Agreement shall be resolved through good-faith negotiation. If negotiation fails, disputes shall be submitted to the appropriate courts of the Philippines.

14. Relationship of the Parties

The Contractor is an independent contractor. Nothing in this Agreement creates an employer-employee relationship, partnership, joint venture, or agency. The Contractor is responsible for their own taxes, insurance, and statutory obligations.

15. Entire Agreement

This Agreement, together with the Reference Specification (Dx7 PRD+SAD External Review Edition v1.3, February 2026), constitutes the entire agreement between the parties. Any amendments must be in writing and signed by both parties.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the date first written above.
